-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the crankshaft must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 18,23,25,27-31 and 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Hall (US 5509491). Hall discloses a dual motor electric drive system comprising: an internal combustion engine (fig 4), a steering drive (114), a differential transmission (70,100) that has a traction drive element (74,104), a steering drive element (88,106), a pair of drive outputs (90,108) and a drive axle (92,110) aligned parallel to the engine and to a crankshaft (fig 4) that would come out of the engine; Hall further discloses a steering drive connection (116,118) connecting the steering drive to the steering drive element; a further drive element (48) transmitting power to the traction drive element and arrange in line with the combustion engine and transversely to the direction of travel. Regarding claim 23, Hall further discloses a generator attached to the engine (fig 4). Regarding claim 25, the further drive element is a traction motor. Regarding claim 27, the steering drive (114) has an electric steering motor (Col 7, lines 27-30). Regarding claim 28, it is inherent to say that the traction motor and the steering motor have different currents driven by different driving circuits so that the motors rotate at different speeds. Regarding claim 29 and 31, the brakes (112,96) attached to the drive outputs can be seen as a retarder. Regarding claim 33, the gearbox (120) transmits the power from the further drive element to the differential transmission.

Allowable Subject Matter

4. Claims 19-22,24,26,32 and 34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
